Milad Tatar Mamaghani

Applied Research Scientist | Wireless Systems, Signal Processing & AI

Sydney, NSW, Australia

milad.tatarmamaghani@gmail.com

Homepage • Google Scholar • LinkedIn • ORCiD • GitHub

PROFESSIONAL PROFILE

Applied researcher and engineer with a PhD in Electrical Engineering and 7+ years of experience across wireless communications, signal processing, optimisation, machine learning, and intelligent systems. Former ARC Postdoctoral Research Fellow at the Australian National University, with expertise in secure and intelligent wireless systems, integrated sensing and communications, and emerging 5G/6G technologies. Strong background in mathematical modelling, algorithm development, simulation, and data-driven methods for complex engineering problems. Author of 17 peer-reviewed publications with near 700 citations, including award-winning work in IEEE communications and signal processing.

EDUCATION

Doctor of Philosophy (Ph.D.) in Electrical Engineering — *Jan. 2020–Dec. 2022*

Monash University - Clayton Campus — *Melbourne, Australia*

- Thesis: *Safeguarding Beyond-5G Wireless UAV Communications: Design and Optimization*
- Pathway: Transferred from Master of Engineering Science (Research) to PhD (Jan. 2019–Dec. 2020)

Bachelor of Science (B.Sc.) in Electrical–Communications Engineering — *Sep. 2012–Oct. 2016*

Amirkabir University of Technology (Tehran Polytechnic) — *Tehran, Iran*

- Thesis: *Secure Communications with Untrusted Relaying and Wireless Energy Harvesting*
- Double degree: B.Sc. in Control Engineering with extra course credits (Feb. 2018)

PROFESSIONAL EXPERIENCE

Technical Subject-Matter Expert — *Feb. 2025–Present*

Mercor (Remote) — *Sydney, Australia*

- Design LLM training datasets and evaluation workflows across mathematics, coding and engineering for top-tier AI labs.
- Analyse recurring model failures and convert them into reproducible validation tests and scoring criteria.
- Collaborate with teams on evaluation pipelines and rubrics for model capability, reliability and robustness.

ARC Postdoctoral Research Fellow (Level B) — *Jan. 2023–Jan. 2025*

The Australian National University — School of Engineering — *Canberra, Australia*

- Pursued research on physical-layer security, short-packet communications, and integrated sensing and communications.
- Published 3 first-author papers in Q1 IEEE transactions (1x IEEE JSAC, IF 17.2, 2x IEEE TWC IF 10.4)
- Presented 2 papers at flagship conferences (1x IEEE ICC 2024 and 1x IEEE Globecom 2023).
- Received 2 best-paper awards (IEEE SPCC-TC BPA 2024; IEEE ICC BPA 2024 — top 0.6% of 2,364 submissions).
- Co-supervised 1 PhD and 2 R&D engineering students, supporting research and educational activities.

Doctoral Researcher — *Jan. 2019–Dec. 2022*

Monash University — Department of Electrical and Computer Systems Engineering — *Melbourne, Australia*

- Pursued research on wireless communications security, resource allocation, signal processing, and IoT network design.
- Designed reinforcement learning and mathematical optimization frameworks for energy-efficient airborne communications.
- Developed aerial MIMO beamforming and energy-efficient trajectory planning architectures to secure UAV networks.
- Published 7 peer-reviewed articles in leading journals; received 5+ awards, grants, and accolades for research excellence.

Monash University, Office of the Deputy Vice-Chancellor — *Oct. 2022–Dec. 2022*

Data Quality & Integrity Officer — *Melbourne, Australia*

- Built Python ETL pipelines integrating a large number of research records from three data sources into a unified schema.
- Automated validation, normalisation and reconciliation checks, achieving 100% reconciliation accuracy.
- Developed reusable data-quality and reporting tools that reduced recurring ad hoc analysis requests by approximately 80%.

Research Assistant — *Jan. 2016–Nov. 2018*

Amirkabir University of Technology — Wireless Communication Research Lab — *Tehran, Iran*

- Researched physical-layer security, untrusted relaying, and wireless energy harvesting, publishing 1 conference and 2 journal papers.

Summer Research Intern — *Jun. 2016–Sep. 2016*

Iran Telecommunication Research Center (ITRC) — Fixed Communications Group — *Tehran, Iran*

- Worked on IoT systems; gained hands-on experience on applied telecommunications systems and network infrastructure.

RESEARCH INTERESTS

My research develops theoretical and algorithmic foundations for intelligent wireless systems that are secure, reliable, and efficient under strict latency and resource constraints. I focus on understanding and exploiting fundamental trade-offs between communication, sensing, and learning in complex wireless environments. My work integrates information theory, optimisation, signal processing, and machine learning to design next-generation 6G networks and autonomous wireless infrastructures. Current research directions include:

- AI-Native Wireless Networks and Learning-Driven Resource Allocation
- Machine Learning and Reinforcement Learning for Wireless Communications
- Physical-Layer Security, Privacy, and Trustworthy Network Design
- Ultra-Reliable Low-Latency Communications (URLLC)
- Integrated Sensing and Communications (ISAC)
- Emerging 6G Technologies: UAV, THz, RIS, etc.

SELECTED RESEARCH PROJECTS

Integrated Sensing and Communications for 6G — *2025–Present*

Security, AI-Driven Resource Allocation, Stackelberg Games, Deep Reinforcement Learning

- Developed the first Stackelberg-game framework for securing UAV-enabled ISAC against a mobile adversary, jointly modelling sensing, communications and eavesdropping. Designed and benchmarked deep-reinforcement-learning agents for adaptive trajectory and beamforming control, enabling autonomous protection of dual-function 6G infrastructure as threats and channel conditions evolve.

Physical-Layer Security for Wireless Machine-Type Communications — *2023–2025*

Finite Blocklength Communications, IoT, URLLC, Information-Theoretic Security

- Led ARC-funded research on secure short-packet transmission for IoT and mission-critical networks. Derived the first analytical framework for average information leakage over finite-blocklength fading channels, validated it against 10^6 simulations with less than 1% relative error, and designed joint blocklength, resource-allocation and UAV-trajectory algorithms that expose actionable security–latency–reliability trade-offs for URLLC deployment.

Safeguarding Wireless UAV Communications — *2019–2022*

UAV Networks, Trajectory Design, THz Communications, Learning-Based Control

- Designed optimisation and model-free deep-reinforcement-learning methods for secure, energy-efficient UAV communications, spanning trajectory control, artificial-noise allocation and THz aerial intelligent reflecting surfaces. The learning-based MIMO-UAV planner improved secrecy rate by up to 42% over optimised fixed-trajectory baselines, while the broader work enabled covert and resilient airborne connectivity under mobility and propulsion constraints.

Wireless-Powered Untrusted Relaying Networks — *2016–2021*

Wireless Energy Harvesting, Cooperative Jamming, Physical-Layer Security

- Derived secrecy-outage and ergodic-secrecy models for amplify-and-forward networks in which energy-constrained relays cannot be trusted. Designed wireless-energy-harvesting and cooperative-jamming schemes that allow relays to forward traffic without gaining useful information, supporting secure and energy-efficient cooperative coverage where dedicated infrastructure is impractical.

SELECTED APPLIED PROJECTS

InvestIQ — Multi-Asset Portfolio Analytics Platform

Python, FastAPI, PostgreSQL, Redis, Next.js, TypeScript, Docker

- Engineered an event-sourced portfolio platform that consolidates multi-broker holdings across 15+ asset classes, normalises foreign-currency positions and automates reconciliation and lot-level CGT tracking. Added performance and risk analytics plus an LLM-assisted adviser, giving investors a unified, tax-aware view of diversified portfolios and decision-ready insights. [GitHub]

Healthmate — Mobile-First Wellness Progressive Web App

Next.js, TypeScript, React, Tailwind CSS, Supabase, Anthropic API, Vitest

- Built a local-first wellness PWA for Mediterranean meal planning, grocery generation, habit and body-measurement tracking, and progress visualisation. Added deterministic meal scoring and safety-constrained coaching with an offline fallback, enabling private day-to-day guidance without mandatory cloud services. [GitHub]

TradingAgents — Multi-Agent LLM Investment Research Platform

Python, LangGraph, FastAPI, React, TypeScript

- Turned an open-source multi-agent LLM framework into an interactive investment-research platform by adding a web console, persistent analysis runs, configurable models and strategy visualisation. The resulting workflow makes agent reasoning, evidence and recommendations easier to inspect, compare and reproduce before investment decisions are made. [GitHub]

CNN Image Classification Benchmark

Python, TensorFlow, Keras, NumPy

- Built a reproducible image-classification pipeline to train and evaluate baseline CNNs, data augmentation and transfer-learning approaches under a consistent benchmark. Achieved 96.0% test accuracy and produced a reusable experimental workflow for selecting accurate models and quantifying the benefit of each training strategy. [GitHub]

HONOURS & RECOGNITIONS

2025 **IEEE ComSoc Best Readings in Covert Communication and Networking [Link]**
- Recognises impactful and landmark technical contributions in the field. Featured paper [9].

2024 **IEEE ICC Best Paper Award [Certification]**
- Selected as top 0.6% of 2,364 submissions across all symposia.

2024 **IEEE Signal Processing and Computing for Communications Best Paper Award [Certification]**
- Recognises outstanding contributions to the field by the Technical Committee; only one paper is awarded each year.

2024 **Australian Global Talent Recognition**
- Recognises individuals of exceptional achievement in technology under the national innovation program.

2022 **Exceptional Ph.D. Thesis**
- Recognised among the top 5% of Ph.D. theses in the field by external examiners.

2019 **Vice Chancellor's Congratulatory Letter for Teaching Excellence**
- Awarded for outstanding performance in teaching and learning based on student evaluations at Monash University.

2014 **Exceptional Talent**
- Recognised for outstanding academic excellence during undergraduate studies at the Amirkabir University of Technology.

2012 **Top 0.2%, National University Entrance Examination (Konkour)**
- Ranked in the top 0.2% among nearly 300,000 applicants nationwide.

2011 **Semifinalist, National Mathematics and Chemistry Olympiads**
- Selected among top performers in national mathematics and chemistry competitions.

AWARDS & GRANTS

2023 **ANU Early Career Researcher International Travel Grant (AUD $3000)**
- An early-career researcher grant awarded by The Australian National University for presenting research at international conferences.

2022 **Monash Postgraduate Publications Award (AUD $5000)**
- Recognises for outstanding research publications during doctoral candidature.

2022 **Monash Graduate Research Completion Award**
- Awarded for successful and timely completion of doctoral research.

2022 **Monash Engineering Faculty's Postgraduate Research Scholarship**
- Recognises outstanding research potential and academic achievement in the field of engineering.

2019 **Monash Graduate Scholarship and International Tuition Scholarship**
- Stipend (AUD $120,000) and full tuition waiver (AUD $200,000) for the doctoral studies.

TEACHING EXPERIENCE

Teaching Associate
Feb. 2019–Dec. 2022

Monash University — Faculty of Engineering *Melbourne, Australia*

- Facilitated hands-on learning through effective tutoring, practical sessions, and lab demonstrations.
- Provided mentorship that enhanced student performance in coursework and engineering design projects.
- Contributed to curriculum delivery by designing assessments and offering constructive feedback to students.
- Mentored students, assisted in designing assessments, marking, and evaluating presentations.
- Achieved an overall student satisfaction score of 4.73/5.0, ranking in the top 7.3% of all University units in the semester.

Courses Taught

- ECE5179: Neural Networks and Deep Learning; Tutor and Lab Demonstrator, Semester 2, 2022
- ECE5883: Advanced Signal Processing; Lab Designer and Demonstrator, Semester 1, 2022
- ENG5001: Advanced Engineering Data Analysis; Tutor, Semester 1, 2022
- FIT1048: Fundamentals of C++; Tutor and Lab Demonstrator, Semester 1, 2022
- ECE5884: Wireless Communications; Lab Demonstrator, Semester 2, 2021
- ECE4191: Engineering Design; Lab Demonstrator and Supervisor, Semester 2, 2020–2022
- ENG5105: Integrated Design; Coordinator and Project Mentor, Semester 2, 2020–2022
- ECE4146: Multimedia Technologies; Lab Demonstrator, Semester 2, 2020–2022
- ECE3141: Information and Networks; Lab Demonstrator, Semester 1, 2020–2022
- ECE4044: Telecommunications Protocols; Lab Demonstrator, Semester 1, 2020
- ECE2072: Digital Systems; Tutor and Lab Demonstrator, Semester 1, 2020–2022
- ECE4042: Communications Theory; Tutor and Lab Demonstrator, Semester 1, 2019–2022
- ECE4076: Computer Vision; Tutor, Lab Demonstrator, and Exam Coordinator, Semester 1, 2019–2022
- ECE2071: Computer Organisation and Programming, Tutor and Lab Demonstrator, Semester 1, 2019–2022

STUDENT SUPERVISION

Yu Li *2023–Present*

Ph.D. Candidate, The Australian National University

- **Topic:** Physical-Layer Anonymous Communications; co-supervised with A/Prof. Xiangyun Zhou.

Mac Gilligan *2024–2025*

Engineering R&D Honours Student, The Australian National University

- **Topic:** SDR implementation for over-the-air secure file transmission with GNU Radio.

Reetika *2023–2024*

Visiting Bachelor Student, Indian Institute of Space Science and Technology

- **Topic:** Physical-layer security for terahertz communications; co-supervised with Prof. Nan Yang.

Engineering Design Project Teams *2021–2022*

Undergraduate and Postgraduate Capstone Projects, Monash University

- **Automated Robotic Arm:** Color-cube sorting robotic arm with microprocessor-based controller, 2021.
- **Autonomous Mobile Robot:** Odometric sensing for high-level navigation and autonomous ball collection, 2022.
- **Intelligent Baby Monitor:** Sustainable monitor with voice/image recognition and real-time parent alerts, 2022.

PROFESSIONAL SERVICE & LEADERSHIP

Conference Organisation and Selection Service

- **Technical Program Committee Member** — IEEE Vehicular Technology Conference, 2024.
- **Session Chair** — IEEE Global Communications Conference, Physical Layer Security Symposium, 2023.
- **Selection Committee Member** — ANU Summer Research Scholarship Program, 2023.
- **Exam Supervisor** — Monash University Online Assessment & Student Services, 2021–2023.

Peer Review Contributions

- **Volunteer Technical Reviewer** for $25+$ international journals and conferences with $140+$ verified reviews, 2018–2026.
  - **Journals:** IEEE JSAC, TWC, TCOM, TIFS, TSP, TVT, TCCN, TMC, TGCN, TNSE, IoT-J, Systems Journal, Access, Communications Letters, Wireless Communications Letters, Communications Magazine, Wireless Communications Magazine, Network Magazine, IET Communications, Physical Communication, Security and Communication Networks, Vehicular Communications, and Engineering Computations.
  - **Conferences:** IEEE ICC (2020–2023), IEEE GLOBECOM (2017, 2024, 2026), IEEE VTC (2024), WiOpt (2023), WCSP (2023), CyberC (2020).

Professional Memberships

- IEEE Member (2022–2026); IEEE Graduate Student Member (2020–2022).
- IEEE Communications Society (2020–2025); IEEE Signal Processing Society (2020–2022).
- IEEE Young Professionals (2020–2025); IEEE Consultants Network (2020–2025).
- IEEE Quantum Community (2020–2022); IEEE Computer Society (2020); IEEE Big Data Community (2020).

SELECTED TALKS & PRESENTATIONS

- On the Information Leakage Performance of Secure Finite Blocklength Transmissions over Rayleigh Fading Channels, presented at the *Communication Theory Symposium: Physical Layer Security and Privacy* session, IEEE ICC 2024, Denver, CO, USA, June 2024. [Slides][Certificate]
- On the Secrecy Performance of Finite Blocklength Communications over Fading Channels, presented at the *21st Australian Communications Theory Workshop (AusCTW)*, Melbourne, Feb. 2024. [Poster]
- Secure Short-Packet Transmission with Aerial Relaying: Blocklength and Trajectory Co-Design, presented at the *Main Symposium on Communication and Information System Security (CISS)* session at IEEE Globecom 2023, Kuala Lumpur, Malaysia, Dec. 2023. [Slides][Certificate]
- Final Review Seminar (Ph.D. Thesis Defense): Safeguarding Wireless Communications with Unmanned Aerial Vehicles: Design and Optimization, presented at the ECSE Department, Monash University, Melbourne, Australia, Feb. 2022. [Slides]

PUBLICATIONS

- **Scholarly outputs**: 12 journal articles, 3 conference papers, 2 preprints, and 2 theses
- **Research Impact**: 696 citations, h-index 13, i10-index 13 (as of September 2026)

TECHNICAL SKILLS

Programming	Python, MATLAB, C/C++, SQL (T-SQL, PostgreSQL, MySQL), NumPy, SciPy, Matplotlib, Pandas, VHDL
Signal Processing	Statistical modelling, detection & estimation, filtering, spectral analysis, hypothesis testing
Wireless Systems	5G/NR, 3GPP, IEEE 802.11, OFDM, MIMO, beamforming, channel modelling, GNU Radio, SDR
Optimisation	Convex optimisation, nonlinear programming, stochastic optimisation
Machine Learning	PyTorch, TensorFlow, scikit-learn, recommenders, classification, clustering
Deep Learning & AI	Neural Networks (CNNs, LSTMs), deep reinforcement learning, Transformers, Computer Vision
Software & DevOps	Docker, Linux, Bash, Git/GitHub, CI/CD, pytest, FastAPI, REST APIs, web scraping

CERTIFICATIONS

- **Data Scientist Professional** [Certificate] — DataCamp, Aug. 2026.
- **Deep Learning Specialization** [Certificate] — DeepLearning.AI, Oct. 2022.
- **Machine Learning Specialization** [Certificate] — Stanford Online, Apr. 2020.
